- ▶ Historical Graphs and Custom Query Reports
- ▶ Email/Text Alerts for Fill Events and Low Usage

MANUFACTURING .... —— PURCHASING .... —— VENDORS

OPTIMIZE INVENTORY
Maintain desired inventory levels based on actual usage

MANAGE PROCESSES
Monitor material consumption variances to better manage processes

BINTRAC CLOUD
Interface into enterprise data software, manage data from all locations using BinTrac Vision

SAFETY
Stop climbing bins and using other physical means to check inventory levels

IMPROVE VENDOR MANAGED INVENTORY PERFORMANCE
Optimize production runs, reduce delivery costs, emergency orders and eliminate out-of-stock events

## PROCESS CONTROL
Improve your performance and bottom line

BIN GRAPHS

- Tandem or single bin level and usage graphs
- Vendor managed inventory access and compliance
- Easily identify bridging and unload delivery line issues

USAGE REPORTS

- Shows daily, weekly and monthly usage for up to 6 months
- Tandem or single bin
- Delivery verification

ORDER FORECASTING

- 5 day predictive orders based on usage and bin capacity
- Available by bin or building
- Color coded based on days to empty
- Eliminate emergency orders

FILL EVENT REPORT

- Track deliveries for the last 6 months
- Verify commodity is delivered to the correct bin and site

BINTRAC VISION MOBILE

- Mobile partner to BinTrac Vision
- Access to bin levels, days to empty, usage and fill events
- Monitor current bin levels, 24 hour and 2 day usage graphs
